

A simple and effective method of traffic management. Full road coverage creates a continuous barrier, unlike conventional cones which allow pedestrians and workers to step out of a safe area. Available with a full range of direction signs, start and finish barrier sections. Standard at 1m long main sections. Can be filled with water to increase weight to improve stability. UV stabilised plastic.

**They do not carry a vehicle stopping capacity rating.**

Length	Width	Height	Capacity
1000mm	400mm	550mm	20 litres
