

**Don't
Forget
Your
Drop
Chain!**

Designed as a safe method of transporting injured personnel with an attendant, from any structure or excavation. Especially useful in any situation where the only alternative is for a stretcher to be man-handled up or down ladders or stairs.

All cages come complete with a four leg chain set attached to the main lifting lugs with couplers. This chain set is rated to give a ratio of 10 to 1 as required by the CE regulations.

Weight:	450kg
Net load:	190kg
Perm.total.weight:	640kg
Min.load.capacity of hoisting ring:	960kg
Width:	800mm
Length:	2600mm
Height:	2200mm
